

# DIC324

## PC/104-Plus Digital I/O Module with Galvanic Isolation

### Features

- 8-bit ISA bus
- 16× digital/frequency input channels
- 8× digital output channels
- Delay of input signals 25  $\mu$ s
- Optical isolation of inputs/outputs between the channels 500 V
- Industrial temperature range: from  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$
- Power supply and current consumption:  $+5\text{ V} \pm 5\%$ , no more than 160 mA
- Software compatibility: FDOS, FreeDOS
- MTBF: no less than 710 000 hours

### Overview

The module is implemented in PC/104+ standard on the basis of the nodes of DIC122 and DIC123 modules.

Electrical parameters are identical to those of DIC122 and DIC123 modules. The modules use a field-programmable bit array (FPGA), which makes it possible for you to change the algorithm for processing inputs and outputs

without changing the topology.

All channels are isolated from the system and from each other.

The channels use two-wire or single-wire connection (with common ground).

It is possible to connect signals of "potential-free" contacts type using an external (up to 52 V) power supply.

Two-wire or single-wire load connection is used.

### Technical Specifications

#### System bus

- 8-bit ISA-bus
- 3× graphics kernels
- 6 MB cache

#### Digital input

- 16× digital/frequency input channels
- Single-wire or two-wire connection of signals
- Output voltages  $\pm 3.2\text{ V} \dots \pm 52\text{ V}$

#### Digital output

- 8× digital output channels
- Single-wire or two-wire connection of signals
- Switched output voltages/currents 60 V / 500 mA (using a differential type of load connection)

#### LED

- Indication of queries (addresses)

#### Main features

- Delay of input signals 25  $\mu$ s
- Measuring frequencies over any channel
- Optical isolation of inputs/outputs between the channels 500 V
- Optical isolation of inputs/outputs between the channel and "earth" 1000 V
- Programmable time interval for de-bouncing at inputs

#### Additional features

- Five separable lines of IRQx hardware interrupts (where  $x = 3, 4, 5, 6, 7$ )
- Upper limit of enabling input channels is determined by the installed sets of registers

#### Industrial temperature range

- From  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$

#### Power supply and current consumption

- $+5\text{ V} \pm 5\%$ , no more than 160 mA

#### Dimensions

- No more than  $100 \times 96 \times 24\text{ mm}$

#### Module weight

- No more than 0,09 kg

#### Software compatibility

- FDOS
- FreeDOS

#### Resistance to electrostatic discharge

- $\pm 4\text{ kV}$  for contact discharge and  $\pm 8\text{ kV}$  for air discharge

#### Resistance to mechanical stress

- Sinusoidal vibrations for frequencies from 10 to 500 Hz: with acceleration no more than 5 g
- Single shocks with duration of 11 ms with a peak acceleration no more than 100 g
- Multiple shocks with duration of 6 ms with a peak acceleration of no more than 50 g

#### Humidity

- Up to 80%, no condensation

#### MTBF

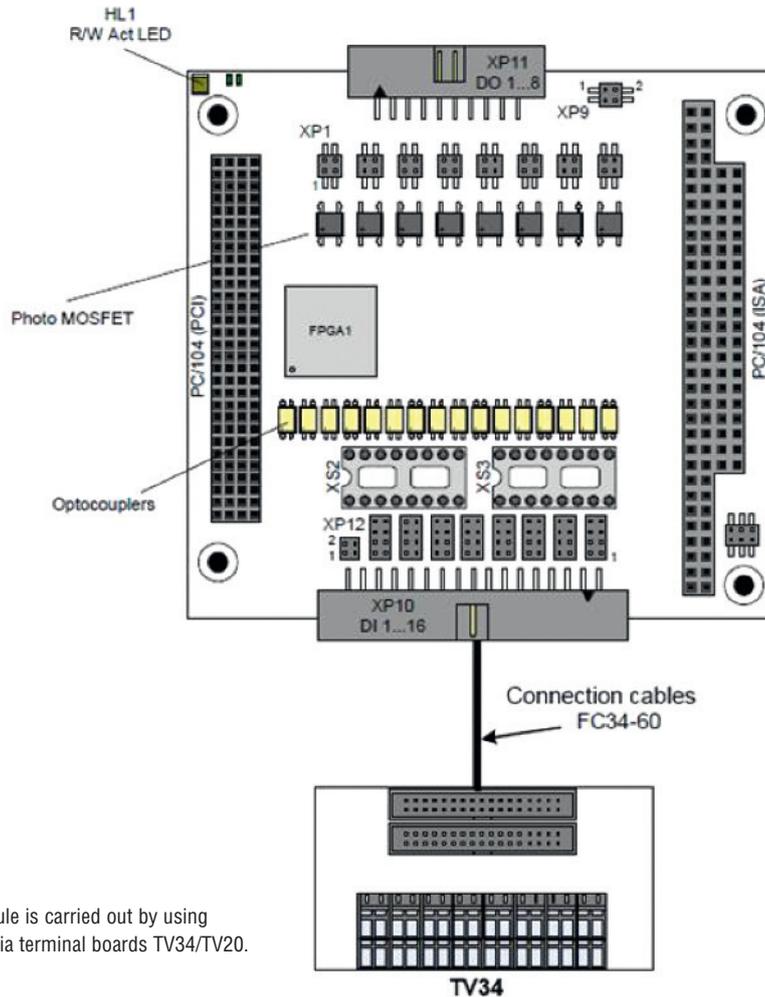

- No less than 710 000 hours

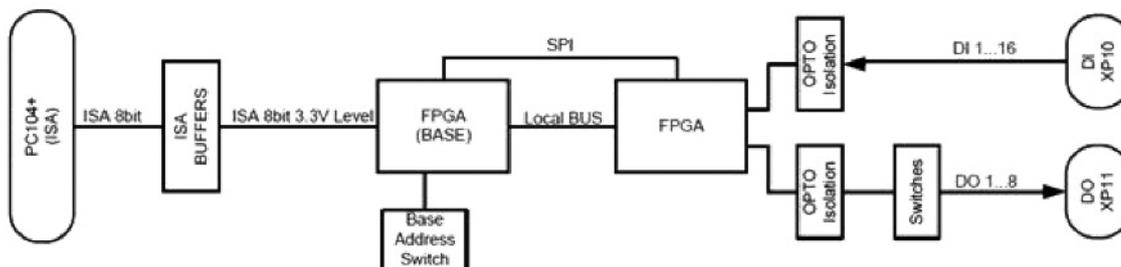

# DIC324

## PC/104-Plus Digital I/O Module with Galvanic Isolation

### Board Layout

Connection to DIC324 Module is carried out by using a ribbon-cable FC34/FC20 via terminal boards TV34/TV20.

### The module's board layout contains main functional elements

- FPGA (BASE) – system FPGA Xilinx XC6SLX4-2CSG225I
- FPGA1 – user FPGS Xilinx XC6SLX4-2CSG225I
- PC104+ (ISA) – edge connector of ISA bus 8 bit
- Digital\_Inputs (DI) – digital input connector (XP10)
- Digital\_Outputs (DO) – digital output connector (XP11)
- OPTO Isolation – represents output buffers with galvanic insulation
- Switches – keys for load switching

### Ordering Information

#### DIC324 Configuration

##### DIC324 - 01 \ Options

###### Configurations

01 Standard version

###### Options

\Coated Conformal coating

#### Delivery checklist

##### DIC324 delivery checklist contains:

1. DIC324 Digital I/O Module with a galvanic insulation
2. Packaging
3. Resistive assembly 470 Ohm 2 pieces

##### Additional accessories:

1. ACS00001 – Cable type FC-20, outlet IDC-20/Outlet IDC-20, length 600 mm
2. ACS00003 – Cable type FC-34, outlet IDC-34/Outlet IDC-34, length 600 mm
3. TIB96401 – Terminal board, 20 pins (TV20)
4. TIB96601 – Terminal board, 34 pins (TV34)
